Swaap Finance – 2020-2024

This web3 application for Swaap Finance allow users to deposit money into the blockchain via a secured smart contract. The smart contract will start market makin for the benefit of the user.

Nauto AI - 2020

Nauto AI is a californian scale-up introducing real time sensors in fleet cars – such as Fedex or UPS. The system detects driver errors and are aggregated into dashboards.

Boston Consulting Group - 2020

I had the luck to work with this huge American firm to deploy the new CMS. The work was technically not that hard (mainly basic Java servlets and CSS), but result pressure was intense.

BCG

Deploy, Reshape. Invent.
To successfully deploy AI at scale, leaders need to embrace our 10-20-70 rule: focus 10% of AI efforts on algorithms, 20% on tech and data, and 70% on people and processes. We've also developed three interconnected plays—deploy, reshape, and invent—to maximize value potential.

Mastering the Megadeal: The New Rules for CEOs

Eye.lo - 2015

Eye.lo is a tracker for telecoms. The application allow admin users to create customized dashboards for functional users – such as sellers or CEO. It's a huge Javascript app for this epoch, made with plain old Angular JS.

Docdoku PLM - 2013

Docdoku PLM is a PLM software running on Ipad, transforming Catia data into Three.js structures. Very innovative, we were able to build this working mvp in a few month with only 5 people.
